
Leveled Literacy Intervention (LLI)

Reading Progress for LLI students at the Luther Low Elementary School in the West Middlesex Area School District in West Middlesex, Pennsylvania 2009-2010

Introduction

The following report describes reading gains for students enrolled in the Leveled Literacy Intervention (LLI) program during the 2009-2010 school year at the Luther Low Elementary School in the West Middlesex Area School District in West Middlesex, Pennsylvania. The Luther Low Elementary School serves 375 students (99% White and 1% Black) in a rural community in the northeast region of the United States. Out of the total student population, 45% are characterized as low income.

Data were collected from four teachers who agreed to submit individual data forms for their 56 students who participated in LLI during the 2009-2010 school year. The completed data forms were sent to the author of this report either by the individual LLI teachers or by a district level contact.

What Is Leveled Literacy Intervention?

LLI is a short-term, small-group, supplementary intervention developed by Irene Fountas and Gay Su Pinnell. LLI is designed to serve struggling readers in grades K-2, although some school districts may use the intervention with older students. LLI is built around the text reading gradient designed by Fountas and Pinnell; this system designates leveled texts from A (the easiest texts) to Z (the most difficult).

LLI is described as a *system* because it includes reading, writing, and word study, each used together and systematically across increasingly difficult levels of texts. Three LLI systems currently exist:

- Orange, recommended for Kindergarten, levels A to C;
- Green, recommended for Grade 1, levels A to J; and
- Blue, recommended for Grade 2, levels C to N.

The K-2 LLI systems are designed to provide 14 to 20 weeks of daily, intensive extra reading lessons (beyond classroom service) that result in accelerated progress with flexible decision making about student entry and exit. Students enrolled in LLI participate in daily (five times per week), 30-minute literacy lessons taught by an LLI trained teacher. The recommended group size is three students at a time with one teacher to allow for close observation and differentiated response to student strengths and needs. Because of restrictions or limited resources, some school districts may alter these requirements but the goal of 1:3 and 5 lessons per week is highly recommended for the strongest outcomes.

The objective of LLI is to help students reduce the gap between their current instructional reading level and their expected instructional reading level.

The intended term of the intervention ranges from about 14 to 18 weeks after which time the students are released if approximate grade level expectations are met. At the end of this time period, students who have made progress but do not yet meet expected instructional reading levels for grade and time are re-

evaluated. The evaluation may suggest more time in LLI lessons or an alternative intervention (such as individual tutoring). Students who have not received a full program of services and are in the intervention at the end of the school year may continue to receive service at the beginning of the next school year. Some students who are taken in to the intervention may have achievement levels more than a year below grade level. Though grade level performance may not be achieved in the short term, if resources allow for service to continue, steady progress may warrant longer term service.

LLI Teachers

Data were voluntarily reported on 56 LLI students taught by four LLI teachers who all served the role of instruction and assessment teacher at the Luther Low Elementary School. The LLI systems were new to many of these teachers. Within the LLI Systems, lesson guides, professional development tutorials and DVD examples of lessons are provided. All of the LLI teachers were trained for five hours using the materials contained in the LLI systems.

Student Characteristics

Data were submitted for 56 kindergarten through second grade students. Of the total group, 58.9% were male and 41.1% were female, and 98.2% were White. Refer to Table 1 for a summary of the LLI student sample size by grade and refer to Table 2 for a summary of the student demographics.

Student Sample Size		
Kindergarten	1 st Grade	2 nd Grade
17.9% (n=10)	39.3% (n=22)	42.9% (n=24)

Table 1. Student Sample Size.

Student Demographics			
% Male	% Female	% White	% Black
58.9% (n=33)	41.1% (n=23)	98.2% (n=55)	1.8% (n=1)

Table 2. Student Demographics.

Of the total group of LLI students, one had an individualized education plan that mandated that s/he receive support for Reading and 17.9% ($n = 10$) of the LLI students had an IEP for other support services.

Results – Reading Progress

Below is a summary of the reading progress of 56 students who received LLI during the 2009-2010 school year. Some of the data submitted by the LLI teachers contained missing or incomplete information. The reported results below exclude cases with missing data.

LLI Groups and Student Attendance

LLI was designed to be delivered in a group of three students with one teacher, five days per week; and the delivery of LLI at the Luther Low Elementary School generally followed these guidelines. Overall, each of the LLI groups was comprised of between two and four students ($M = 3.0$, $SD = .4$) and the groups met between four and five days a week ($M = 5.0$, $SD = .1$) for 30 minutes per session (see Table 4). Additionally, all of the LLI students received additional small group reading instruction four times per week in their classrooms.

The LLI students who completed the full set of LLI sessions offered to them and for whom attendance information was available received LLI for an average of 15.3 weeks (*range*: 4-27, $SD = 6.3$) and they attended an average of 54.6 LLI lessons (*range*: 12-105, $SD = 25.4$) (see Table 4).

Reading Progress

The data were collected and reported for LLI students only. No control group was identified and assessed and therefore, the Luther Low Elementary School LLI student growth was compared to Fountas and Pinnell grade level criteria (see Table 3) to assess the group's progress. Each student's reading gain was determined by looking at their pre- and post- LLI instructional reading levels (ranging from Pre-A to Z) which are based on the Fountas and Pinnell leveled text system.

- **Obtaining Fountas and Pinnell Instructional Reading Levels**
The F&P instructional reading levels were obtained through the teachers' reports of their students' instructional reading levels which were determined by the administration of Reading Records or by the conversion to F&P levels of the teacher's reports of their students' score on other assessments including the DRA or other reading assessments.
- **Conversion to Time Equivalent (TE) Score**
Once each child's instructional level at entry and exit was obtained, the levels were converted to a Time Equivalent (TE) score which represents the number of months of school a typically progressing student is expected to have completed when they demonstrate the reading behaviors associated with each level according to Fountas and Pinnell guidelines. The TE scores represent the number of months the student was in school and are based on a ten month school year because children are not in school for two months of each year. If an instructional reading level is expected over more than one month, the TE score reflects the middle point of the expected band of time that the particular level is expected (see Table 3). For example, level C is expected at months eight, nine, and ten during Kindergarten and the time equivalent for level C is month nine.
- **Calculating Reading Gain**
The difference between the entry and exit TE score reflects the gain (number of months of progress) the student made between entry and exit from LLI. For example, a student who enters LLI at level A and exits at level C has progressed from what is expected in the fourth month of Kindergarten to what is expected in the ninth month of Kindergarten and thus, the student's reading gain is five months.

Fountas and Pinnell Instructional Level Expectations for Reading and Time Equivalent Scores (months) for each Level										
	Month 1	Month 2	Month 3	Month 4	Month 5	Month 6	Month 7	Month 8	Month 9	Month 10
Kindergarten	Pre-A TE=2	Pre-A TE=2	Pre-A TE=2	A TE=4	A/B TE=5	B TE=6.5	B TE=6.5	C TE=9	C TE=9	C TE=9
1st Grade	C/D TE=11	D TE=12	E TE=13	E/F TE=14	F TE=15	G TE=16	G/H TE=17	H TE=18	I TE=19.5	I TE=19.5
2nd Grade	I/J TE=21	J TE=22.5	J TE=22.5	J/K TE=24	K TE=25	K/L TE=26	L TE=27.5	L TE=27.5	M TE=29.5	M TE=29.5
3rd Grade	M/N TE=31	N TE=33	N TE=33	N TE=33	O TE=36	O TE=36	O TE=36	P TE=39	P TE=39	P TE=39
4th Grade	P/Q TE=41	Q TE=43	Q TE=43	Q TE=43	R TE=46	R TE=46	R TE=46	S TE=49	S TE=49	S TE=49
5th Grade	S/T TE=51	T TE=53	T TE=53	T TE=53	U TE=56	U TE=56	U TE=56	V TE=59	V TE=59	V TE=59

Table 3. Fountas and Pinnell Instructional Level Expectations for Reading and Time Equivalent Scores (months) for each Level.

Overall, the LLI students progressed an average of 8.4 months ($n = 55$, $SD = 4.9$) from entry until exit from LLI. This growth was achieved during participation in LLI for an average of 15.3 weeks. It should be noted that while the LLI teachers strived to provide all scheduled LLI lessons each week, vacation and absentee days often made this impossible. In spite of this, the LLI students progressed an average of almost eight and a half months in a little less than four months. As a group, the LLI students moved forward at an accelerated pace when compared to typical reading progress over time according to Fountas and Pinnell guidelines (see Table 4 and Chart 1 below).

LLI Implementation and Student Growth					
	Average # of Students in Group	Average # of Weeks of LLI	Average # of LLI Lessons Per Week	Average # of LLI Lessons	Average Student Growth in Months
Kindergarten	M = 3.2 n = 10 SD = .2	M = 11.5 n = 10 SD = 4.1	M = 4.9 n = 10 SD = .3	M = 39.9 n = 10 SD = 14.6	M = 3.3 n = 9 SD = 1.3
Grade 1	M = 3.0 n = 22 SD = .2	M = 17.3 n = 22 SD = 7.3	M = 5.0 n = 22 SD = 0	M = 60.9 n = 22 SD = 30.1	M = 8.6 n = 22 SD = 4.9
Grade 2	M = 2.9 n = 24 SD = .5	M = 15.0 n = 24 SD = 5.3	M = 5.0 n = 24 SD = 0	M = 54.9 n = 24 SD = 22.3	M = 10.1 n = 24 SD = 4.5
Grades K-2	M = 3.0 n = 56 SD = .4	M = 15.3 n = 56 SD = 6.3	M = 5.0 n = 56 SD = .1	M = 54.6 n = 56 SD = 25.4	M = 8.4 n = 55 SD = 4.9

Table 4. Average Number of Students in Group, Average Number of Weeks of LLI, Average Number of LLI Lessons per Week, Average Number of LLI Lessons, and Average Student Growth in Months by Grade.

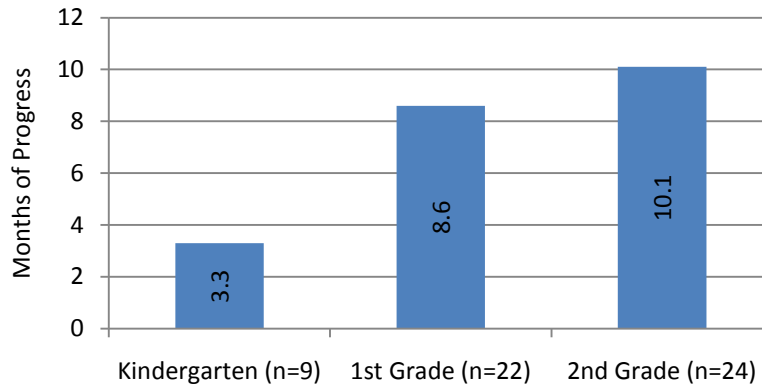

Chart 1. Student Growth (in months) by Grade (n=55)

The instructional reading level gain for the LLI students is depicted in Chart 2 below. 70.9% of the LLI students demonstrated an instructional reading level at least three levels higher than their pre-LLI level and 16.4% raised their reading skills seven or more levels, which in all grades represents more than a year's progress (see Chart 2).

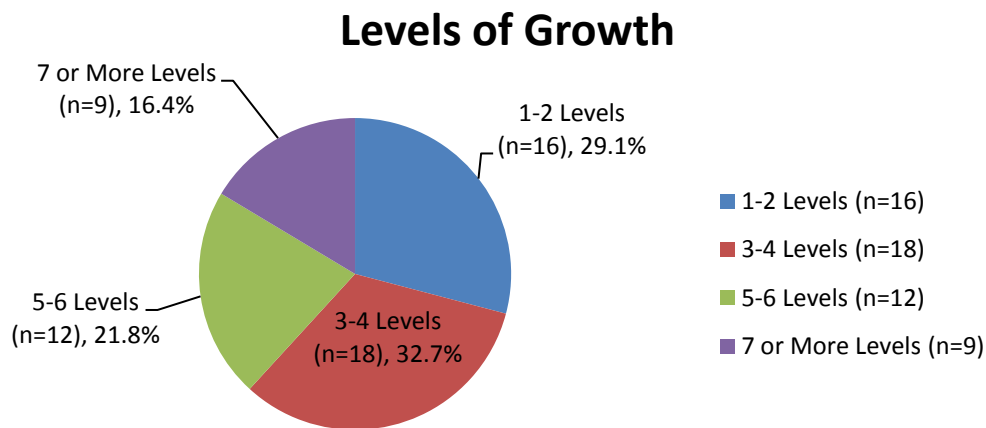

Chart 2. Levels of Growth (n=55).

The results reported for the Luther Low Elementary School LLI students are positive. All of the students achieved some growth and 70.9% made significant progress.

Grade Level Attainment

The percentage of students who were below grade level or at or above grade level at entry and exit from LLI, as determined by Fountas and Pinnell guidelines, is depicted below (see Table 3 and Chart 3). Overall, post-LLI, 78.2% were at or above their expected instructional reading level and 92.7% were within one text reading level of their expected instructional reading level when their LLI instruction ended (see Table 3 and Chart 3).

Chart 3. Instructional Reading Level at Entry (n=56) and Exit (n=55).

Key Findings

- On average, the Luther Low Elementary School LLI students demonstrated reading progress over the span of time they participated in the intervention which is comparable to expected reading progress over 8.4 months during the school year. This progress was achieved during the students' participation in LLI for an average of 15.3 weeks or just less than four months.
- Post-LLI, 70.9% of the LLI students demonstrated an instructional reading level at least three levels higher than their pre-LLI levels.
- Post-LLI, 78.2% of the LLI students were at or above their grade level expectation for reading according to Fountas and Pinnell guidelines.

Conclusions

Results of this evaluation indicate that as a group, the 56 Luther Low Elementary School struggling readers who received Leveled Literacy Intervention supplementary instruction in the West Middlesex Area School District demonstrated accelerated progress over the period they received LLI; on average the LLI students made more than twice the amount of reading progress when compared to typical reading progress over time (Fountas and Pinnell 10 month guidelines). In addition, all students achieved some growth and almost three quarters of the students made significant reading progress. Furthermore, post-LLI, more than three quarters of the LLI students were at or above their grade level expectation for reading according to the Fountas and Pinnell guidelines (see Table 4).
